Background: This enables the TDOC to identify the presence of hidden persons by detecting a small, measurable shock wave by the beating of the human heart. This equipment is an important asset for security and law enforcement officials in preventing unauthorized persons from entering or exiting the prison grounds. Additionally, this is a vital part of the TDOC Mission of operating safe and secure prisons.

Vendor Name and Location:

US Engineering Solutions

3 Lewis St.

Hartford, CT 06103

Main User Agencies: TDOT, Local government bridge owners

Estimated Annual Volume: \$270,360

Spend to Date: \$434,200

Original Estimated Annual Cost Savings (if any):

Background: Bridgewatch is an internet based bridge monitoring and alert system for scour critical and unknown foundation bridges around the state of Tennessee. It is specifically built to use TDOT specified bridge data and flood event threshold information to monitor scour critical and unknown foundation bridges 24 hours a day, 7 days a week using data from NOAA, NWS, USGS, and other TDOT owned devices such as on site monitoring equipment. This program meets FHWA requirements for monitoring of these types of bridges.
