**Estimated Annual Volume:** \$800,000.00

**Spend to Date:** \$ 3,408,457.00

**Original Estimated Annual Cost Savings (if any):** 0

**Background:** The current contract expires April 30, 2014 with no options to renew. An Event was held to solicit potential vendors for the award of a new contract. Of the 27 invited vendors none chose to submit a response, including the incumbent, Black Box Networking Services. CPO requests approval to extend the current contract with Black Box Networking Services for 90 days, on the same terms and conditions as the current contract, in order to allow sufficient time for both CPO and OIR to determine the best course of action.

The purpose of the current contract is to provide a source of supply for Digital Hybrid Key Systems for new system installations, as well as maintenance/repair, additions, moves, changes and upgrades of existing systems. The State has approximately 900 Vertical (Comdial) hybrid systems in operation. These numbers are expected to continue to decline over the next several years, however, it is necessary for OIR to provide support services to the existing locations so agencies can continue to provide mission critical services to their customers.
