RE: Request to appear before the fiscal review committee regarding non-competitive contract amendment for agency tracking # 33103-01013

Please consider the enclosed request for non-competitive contract amendment with Harris, Mackessy, and Brennan, Inc. (HMB). Tennessee's ePlan system serves as the planning and reimbursement system for all of the 148 local educational agencies (LEAs) and special school districts, managing over \$6 billion in state and federal funding. Initially, only two federal grant programs were located in ePlan. The ePlan system now accommodates all funding streams used by LEAs to carry out basic education and other state programs, as well as federal grant programs.

With the addition of over twenty new programs, we need to expand the original functionality of the system to accommodate this increase and make the planning, reporting, monitoring, and reimbursement process seamless for districts. Specifically, an amendment is needed to create an enhanced financial monitoring tool in ePlan and expand functionality to support the integration of third-party data analysis tools, including; designing a configurable application launch capability, framing mechanism, and support for enhanced single sign on (SSO) security to ensure the integration appears seamless to an end user. These two enhancements are in direct response to user feedback and allow us to offer districts a single environment with which to complete their funding and grants management needs. These additional scope items increase the maximum liability by \$173,920.00.

HMB's electronic grants management platform was originally gifted to the Department of Education in 2011, and the ensuing implementation has streamlined processes for districts and expedited the time in which they receive reimbursement and funding. ePlan in its current form contains many of the foundational elements needed to support these two scope amendments and is a well-established platform. We have determined that enhancing ePlan represents significantly less cost in development work, set up and training than attempting to procure a new system to provide the enhanced functionality, with the significant additional benefit of giving districts only one tool to address all of their fiscal planning needs.

Thank you for your consideration.

<p>HMB is our vendor for the ePlan system, which was originally gifted to the State in 2011. ePlan is our electronic grants management platform that houses district and school plans, applications for funding and budgets (both state and federal), and processes the payments and reimbursements for districts. ePlan already contains many of the workflow requirements and application steps needed to seamlessly embed a monitoring tool. The amendment will add roles, administrative controls, and monitoring templates to a system where the structural elements already exist and funding applications are approved, rather than procuring a separate system that would have setup costs associated. By amending this contract, we provide districts with a one-stop-shop for funding and grants management needs without requiring districts to log in and out of ePlan or go to a different site. These additions are responsive to district feedback and reduce the administrative burden of duplicative data entry. We have determined that enhancing ePlan represents significantly less cost in development work, set up and training than attempting to procure a new system to provide the enhanced functionality, with the significant additional benefit of giving districts only one tool to address all of their fiscal planning needs.</p>
